Visualize your design elements by adding layers. These layers can contain information, like comments and annotations. Highlights, notes, and other annotations now appear on shape edges as visual cues for your team. Define which sections of your drawing can be shared with the community. Prevent unauthorized editing of your shared sections and share only as much as you want. Better way to draw. New drawing tools and navigation improvements. Export, sync, and share directly from AutoCAD. Incorporate realistic visual effects to help you easily read line numbers, annotations, and legends on the fly. Easily document your

construction phase with the ability to create an image of your construction drawing. Select new drawing views to get the most out of your work. Easily navigate the canvas, and zoom in or out to your choice of resolution. Quickly access reference images, or create new ones, with just a few clicks. This allows you to browse through many images at once and more easily find the image you're looking for. The reference tool displays images from Wikipedia, Bing, or Yandex while you work. Take it with you with new export capabilities including live streaming with your video. Rapidly send and incorporate feedback into your designs. Import feedback from printed paper or PDFs and add changes to your drawings automatically, without

additional drawing steps. Markup Assist – what does it do? Rapidly send and incorporate feedback into your designs. Import feedback from printed paper or PDFs and add changes to your drawings automatically, without additional drawing steps. Import visual feedback like marks, notes, and annotations directly into the drawing, from a paper, PDF, or web page, or import some or all of them as template files that you can then apply to your drawing. You can edit the templates in-place, or take them back to the source. Intuitively search and navigate through paper and PDF documents and other Web sites, to find and import specific content and comments in a single operation. Create an archive of all imported content, or create a
