In March 2013, Autodesk announced AutoCAD LT, a low-cost solution for a low-volume team of 2-5 designers. This announcement was made concurrently with AutoCAD 2013, AutoCAD's first major desktop release since the introduction of AutoCAD LT. AutoCAD, the company's flagship product, is the most widely used 3D CAD application in the world, used for 2D and 3D architectural and industrial design, and for architectural and mechanical engineering. An update of AutoCAD 2009 in 2013 added the ability to perform 3D modeling. AutoCAD LT is aimed at users of AutoCAD who have one or two designers on staff, typically those used in a small company or organization that has limited budgets. Like AutoCAD, AutoCAD LT is capable of both 2D and 3D modeling, and can be used by individuals or teams. Dr. Richard, I have finished most of my 6 months of writing for September, and August was a good month, the only downfall being that the debt continued to grow. I knew that I needed to start a budget so I could actually start tracking what I have spent and where I have it coming from. I created a spreadsheet that was just for tracking the money that I have. I have a number of categories to track my money, and I am trying to separate my own money from what my parents have contributed, so that I can have a clear understanding of what is coming into my home and what is going out. So far my totals look pretty good, and that's because I was able to get some work done for my job. I have been able to save about \$10.00 every week. The last couple of weeks I was having trouble keeping up, but that is why we have a budget. We need to make sure that we keep ourselves on track. I am able to make our regular grocery shopping lists, and we are trying to eat at home more to cut back on the grocery costs. I have lost about 15 pounds since I started working out. I am hoping to get back down to about my college weight before I move. I would like to start saving again, but I don't think I will be able to for a while. I have to finish paying off my credit cards first. I do not want to go back to borrowing money from my parents or getting more credit cards. I hope that my husband and I will be able to stick to this budget when it comes time to pay off the student loan. If we do get into a financial problem, we have money that we will be able to use to pay off the loans, and I think that we will be able to stick with the budget if it is only temporary. I am working on finishing the first year of college. I am looking forward to being able to do the real work and not have to do tons of extra work to get done. I know that this will make it easier for me to get a job after college.
