Cyrillic, Tigrigna-Ethiopian, Vietnamese, Windows IME. By default, the software applies no input method. Teamwork in text editing The application comes with an integrated server, meaning you do not need extra hardware or software settings, except install Gobby on each required computer. You may set access restrictions, by password protection, self-signed certificate or by using an existing private key and certificate. Any of the authorised users can access the documents and make modifications. Once they save the document, the changes are automatically applied for the other team members. The software is divided into three areas: the one on the left displays the document collection and allows you to select any file and open it. The one in the center displays the file content, while the one on the right contains the currently active/connected stations. Reliable tool for collaborative text editing Gobby is simple to use and allows you to edit text files, along with other team members, in real time. All modifications are automatically synchronized, meaning you and the rest of your team can view the same content at once. Multiple text editing options are at your disposal, including Unicode control characters or syntax highlighting. This is a closed Beta stage product so be sure you have a backup copy of your important data.
