Outbreak Island is a free open-world survival simulator where all players are trapped on the same island. Unknown forces changed the island ecosystem from a scientific reservation into a black hole where death and suffering reigns at night. For humanity it is the final moment of existence. Players will have to build a camp, grow crops, acquire medicine and weapons, explore the island and hunt for food. Do not expect to have a vacation here. The island is a big and dangerous place, where every decision could save or doom your life. Players will choose their role and their tactics and decide if they want to be lone hunter, stealthy hunter, or a fearless warrior. In the open world Survival Simulator, not everything is as you think. Expect wildlife that's smarter than you and traps and monsters waiting for you all the time. Development: Main development for Outbreak Island was done by Dr. Tolmie. He's the person who brought Frozen Synapse to life. As a fan of this game he based it mostly on Outbreak Island. He introduced multiplayer, weapons and more. Outbreak Island isn't a commercial release of any kind and is only free as in 'free beer'. It is not an early access or a beta release. It is a small, still in development proof-of-concept. It isn't going to be finished, but it already provides you with an entertaining survival experience and gives you the opportunity to be a hero on a dangerous island. Unlockables One of the game's unlockables is the ability to create a different character and custom loadouts, which allows the player to possess several weapons, tools, and special abilities. If  $\mathbb{S}^n$  is a topological manifold whose fundamental group is finitely generated, then its rational homology modulo  $2\mathbb{Z}$  is an honest homology, so that  $H_n(\mathbb{S}^n; \mathbb{Z}/2\mathbb{Z}) = H_n(\mathbb{S}^n; \mathbb{Z})$ .

Multiple Players Free-for-All Win or Lose Class Abilities 1. Photon - Lasers Photon is the most basic class and the one with the most laser power. This class uses quick-fire bursts of energy to keep opponents at bay, 2. Electron - Time Control Electron has the ability to slow down time for himself and opponents. He can then use this to land a powerful melee attack and cripple his opponents. 3. Neutrino - Speed Neutrino has the ability to push opponents around with powerful bursts of energy. 4. Gravitron - Push Your Opponents Around Gravitron has the ability to put out huge amounts of energy that can be used to push opponents out of the way. He can also teleport to another point to change up the battlefield. Game "Beyond Critical" Battle Revealed: Players can choose from four unique classes or choose to play as Neutrino and play a sneaky agent in a tactical perspective. Players can then team up to fight for control of the black hole. Players select from a variety of different colored powers to customize their characters and form unique teams. Players can also customize the arenas with the stock versions of the colors in a variety of shapes. If the players reach critical mass on the central black hole, their super massive rage will explode. The player or team that explodes with the most mass collects a point. A unique innovation in the combat is the ability to fire kinetic projectiles in return for a higher projectile capacity. Simply take aim and fire a powerful energy projectile at an opponent and you will lose your mass. It is important for players to remain isolated with control of the black hole. If an opponent gains control of the black hole they can blow up players that approach and grab mass. This can drastically change the outcome of a match. Beyond Critical is a cooperative game where all of the players must stay focused on the battle. Game "Beyond Critical" Features: Multiple Players - The multiple-player gameplay supports up to four simultaneous players in duel mode or team based mode. Free-for-All - Battle for control of the black hole with up to four players of any class. Choose to play as one of the four unique characters or play as Neutrino and take a tactical approach. In the new federal plan released this week, the city of New Orleans, along with neighboring Jefferson Parish and Lake Pontchartrain (the surrounding area of New Orleans) will get \$24 billion in federal funds for rebuilding. But they also must take additional steps to hold the city accountable in terms of where it will be allowed to build and how residents are impacted by it. This includes a longer period of time to construct a building and certain zoning regulations that are more demanding. "Each time we have a flooding event, there's an influx in temporary accommodation until these homes are rebuilt," she said in a phone interview. In the UK, projects moving forward toward building a permanent home are implemented within a month of the flood. That is similar to the pressure to move forward in New Orleans, but the**
