"The AI on this title is capable of adding that tactical element, reacting in individual moments when required," said Noah Chambers, Product Director of Pro Evolution Soccer. "We are also coming into the new 'industry' of eSports and competitive gaming, which is why we have chosen to release the Enhanced AI on console simultaneously with the launch of FIFA on Steam." The enhanced AI is present in all gameplay modes available in FIFA: Career, Ultimate Team, FIFA Ultimate Team, and Online Seasons. Career Mode: The Enhanced AI in Career Mode is more resourceful, faster to react and more talented at directly creating chances than in FIFA 17. Players now run back more, making it easier to penetrate defence with unopposed dribbling runs. The Enhanced AI is capable of picking out more dangerous players running off the ball and actively trying to create chances. Defenders are more willing to get stuck in and try to tackle the player with the ball rather than simply making a simple, static tackle. In a Real-Match Replica, the Enhanced AI is capable of bringing both quality and quantity to the action, adding in realistic touches that have been missed out in FUT and Online Seasons. Players are now more hungry to get closer to the ball and more aggressive in chasing down loose balls. The Enhanced AI reacts more quickly to run off the ball, pass, tackle and set up in every situation. Players can now dribble and shoot with greater accuracy, even during defensive challenges. As a result, defenders are more likely to make mistakes and concede a goal, giving the player more opportunities to score. High-Speed Soccer: The Enhanced AI in Career Mode is more aggressive and pressurizes defenders more aggressively at full speed, which results in more saves and goals. The Enhanced AI makes more runs off the ball when playing at full speed, running at opponents more quickly and intelligently, which creates more open space. The Enhanced AI is also more willing to put more weight and pressure on defenders, which opens up more space for the attacker. As a result, a team can penetrate defence more easily through space, while the defender is also more likely to concede a goal. FIFA Ultimate Team: Online Seasons and FIFA Ultimate Team are the most authentic and complete football titles, and the Enhanced AI gives players an exceptional soccer experience. FIFA Ultimate Team: Online Seasons: The Enhanced AI gives the players more possession of the

FIFA is a football simulation game series created by EA Canada since 1992. Since the launch of the series in FIFA '92, the game has won over 30 Game of the Year Awards. FIFA is the definitive football experience for any platform on the market, and the most-played sports game of all time. Who Am I Playing As? You, or a player from the club you support. With more than 700 million footballers from over 200 countries being simulated in the game, there are so many possible combinations. FIFA lets you play in every country, age group and position. How Are They Made? Every FIFA player is carefully created with a detailed model of the player, specific animations, and hundreds of different face animations. Once they're in-game, they are passed through our pipeline to be rendered, match optimised and put through numerous play tests. The final product is a video game player that is so realistic that the National Football Teams use this technology to create their World Cup rosters. What Makes This Game So Special? FIFA's gameplay is driven by fundamental changes we've made for the first time in the series. Our Season Mode now starts with a new, more advanced Career Mode where you're presented with more game-like decisions and distractions, all with the ultimate goal to keep you engaged and enthralled. New Traits Traits are core elements of your player that influence their gameplay style. You can choose what your player has, and choose how it will impact his game. Traits include speed, power, agility, composure, vision, physique, skills, technical, speed, and more. Every football game will tell a story through player traits, and with FIFA, your story changes every year. New Traits Traits are core elements of your player that influence their gameplay style.
