SoftSpire OE Converter [Win/Mac]

SoftSpire OE Converter Crack + Free Download

SoftSpire OE Converter Crack For Windows is a small but reliable application that allows you to convert Outlook Express e-mails to Outlook, Windows Live Mail, Mac Mail, Entourage, Thunderbird or PDF files. Even though you convert DBX format to PST, the output file will still contain the original dates of sent or received items, metadata details or read/unread status of the messages. The metadata preserved refers to details of the e-mail, like subject, date, to, from, time, cc and bcc, e-mail formatting, Unicode characters and images. With this program, you have the option to convert the whole default Outlook Express folder. If you have the DBX files stored in a different location, you can browse to the specific folder. The utility will automatically find the convertible files and display a message to inform you about the number of files found. SoftSpire OE Converter also allows you to skip the deleted items from conversion. When the process is started, two progress bars will be displayed to inform you about the status of each of your files and of the overall process. Also, the utility allows you to merge all DBX files found into a single PST file, or create separate Outlook documents for each one of the files to be converted. The batch function allows you to easily convert multiple DBX files at once. To summarize, SoftSpire OE Converter provides an easy solution for converting all the mail folders, like Inbox, Sent Items, Drafts, Deleted Items and other custom subfolders in PST documents, while preserving the metadata details. SoftSpire OE Converter Screenshots:Total hip arthroplasty in rheumatoid arthritis patients using a bone-saving protocol. This study examined the efficacy of a protocol of conserving the bone stock of the acetabulum in primary total hip arthroplasty (THA) for patients

with rheumatoid arthritis (RA). In a prospective case series, thirty-five primary THAs were performed in patients with RA. The bone-saving technique was used in all arthroplasties. In this technique, the acetabular ream was minimized (size 3) and only a trough was created in the anterior acetabular wall to reduce the risk of stress shielding. The mid-cortical bone stock was preserved in all cases. All cemented acetabular components were produced from low alumina ceramic. The acetabular defect was filled with
