I am writing a Jenkins plugin to display test result in a cross-platform UI. Is there a way for me to do this without making two separate plugins? A: Yes, it is possible. The basic idea is to use a generic view (e.g. HTML or Velocity) to render test result data, then display it within any other Jenkins view (e.g. a dynamic report page, a view log, etc.) You may find it useful to take a look at Jenkins Python Script View Plugin source code, which is open source and ca3bfb1094
