

December 31, 2020 - Restart your computer if you still didn't do it. The d3dx9_43.dll error can be an accident and a simple restart can fix it completely. If it repeats every time you launch the game, try checking if you have enough disk space. If that doesn't help, try using Disk Cleanup. It will delete or move files that may have been accidentally deleted and free up space. This may also solve the problem. If the problem persists, try closing all games and then restarting your computer. If the d3dx9_43.dll error persists, then you should install DirectX.
