No team would sign Derek Jeter if they were running out of candidates. Several teams do have openings in the coaching department. No team has openings in the General Managership. Or the Accounting Department. Or the administrative position. That's because those department needs can't be filled by anyone who is still a player or if the player isn't an everyday player. As you are learning to be a better bench player I think you will be shocked how much of life is like that. But there are some good decisions to make too, yes. I don't think I started thinking about them before I got sick. I think think I started to think about them because I had a job to do, and I like to be accountable to other people. But overall, I can't point to a specific moment where I started thinking about these questions. I see myself a guy who will die and that's a really strange place to be. Story: When the cyborg Stepper emerged from his coma he discovered that he has been reprogrammed and forced to infiltrate the VR society of 2055 where he can exchange basic information on his “inner world”, the nanotechnology of his body, or in some cases, he can watch movies, play video games, or socialize with others. I'm sure you've seen those weird augmented reality glasses and the whole contactless payment thing. So of course, there's no way to do that. Except, uh, you know, temporarily, of course. But they won't let you inside their virtual world, the VR-West. So you're going to have to

hack them! To do so, you'll have to access their network to get in and crack their security system, but that's easier than you think. Tons of features: - You won't be able to save your progress, so you're going to have to play it all in one sitting. - There's no loading, so it's pretty seamless. - You can speak with others in the scenes that you're inside, they'll let you know if you're actually playing a scene or not, but it's pretty safe to assume that you're in one, and they will react to you. - Within the scenes, you'll have to solve puzzles and you'll get hints to do so, sometimes you can press buttons to activate objects. - Your dialogue choices will impact the way other people behave around you. - You will need to hack into the VR-West's system and gain access to their network to enter their VR space. - You can change your character appearance, including your voice. - You can create your own world in the VR-West if you don't want to play any of the other cyberpunk dream scenes. - You can type into your prompt to communicate with other characters and use it as a means to find out useful things about them. - There are four different biomechanical sub-types of cyborgs you can be, and two non-cyborg types. - You can customize your character appearance using your character's alter ego, or the way you look. - You can change your cybernetics, hacking into their system
