0 Member(s) so far Not downloading for many reasons: 1) cannot find it on my account.. 2) there is no crack due to firewall on my computer 3) there is no Linux version. 4) no mac version, again no crack. 5) "Copy protection" 6) I guess many other Linux users are in the same situation. 7) "Taban " So just a quick question, is this game ever going to have a mac version? It would be very VERY easy to make, I can find the code, it's just a matter of programming a mac variant of Dreamgame2 and to autoplaying the download for me. I play this and it's awesome, but I have two cats and they tend to throw up on my computer screen. This makes it incredibly annoying to focus on. Is it possible to play as an adult male Ranna? I could get behind him but my cat (and multiple friends) can't.
