Man jailed for allegedly trying to sell pictures of nude children A MAN has been jailed for 12 months after he was found in possession of 11 allegedly indecent photographs of children. PC Philip Ponting, from the Children's Services Team, searched the suspect's bedroom and found five volumes of magazines he identified as containing child sexual abuse images. They included an early interest in kinky sexual role-play, including one of a girl partially undressed and dressed as a schoolgirl carrying a schoolbag. In a separate search of a second property, police found more magazines with similar images. Ponting said: "The type of images involved are indicative of a serious sexual interest in children rather than a paedophile collector of material. "The images are typical of those that are available on the internet but are far less risky. If they are found on the streets, children are likely to be the target. "The magazines in his possession were all pornography and aimed at a primarily paedophile market." The suspect was arrested during a search for his own safety, having phoned his mother and sister and reported that he was a victim of revenge porn and that his ex-partner was trying to sell pictures of him to paedophiles. He was cautioned and taken for an interview. The next day, he made a further statement. He was cautioned again. That was when he admitted to having 97 pages of child abuse images on his computer and on memory cards - some of them actually sexual abuse, such as one of an under-age girl having sex with an older man. Ponting added that the images shown did not fully resemble any of the images of the victim. During the interview he "became distressed" when he was shown the images and asked if he would continue to cooperate. He admitted having one image of an under-age girl, a different one of a girl naked from the waist up with her arms spread wide and another of a girl naked with her back turned, but again Ponting said the images did not relate to the victim. He spoke to her and said she was 13. The man gave a full account of how he gained access to the image and password of the laptop, and where he got the memory cards. He said he knew they were "absolutely disgusting" and "horrible" and apologised, Pont
