I've figured out how to do this. This can only be done if you are already logged into the Simatic Secure Administrator. First you need to log into the SCAD as its username and password. You can do so via the login page found on the website. Now you need to find the section called: "Unlock file of SCAD". In my case, this was found under: Internet Explorer: Tools - Internet Options - Advanced - Additional Mozilla: Edit - Favorites - Advanced - Cookies You need to find "Unlock file of SCAD". This can be either "Internet Explorer" or "Mozilla" depending on which browser you are using. Right-click the folder and select "Properties". Click "Delete" at the bottom and press the "OK" button. In my case, this was the "Internet Explorer" option. At this point, you should be logged into the SCAD using a user name and password.

Now click on the "S7-200" tab. In my case, this was found under "Hardware". Right-click on the "S7-200" tab and select "Properties". Click the "Settings" button. You need to find "Password Factory". This will be found under the "View" menu. Click the "Tables" button. The "simatic\_password\_factory\_data" table should be found. Right-click on that table and select "Properties". You need to find "Password Factory" at the bottom of the table. There will be 4+ data columns. That's where the actual password will be. Now you'll need to go to where the password is stored. You do this by clicking the "CustomerLists" folder. Under "Server" should be "Database" and this is where the data is stored. There will be a folder with 3 files. You need to copy the last file and paste it here. Restart the server

but little-known ex-congressman from El Paso. Beto failed to unseat Republican senator Ted Cruz in the 2018 midterm elections, but the next year, he rode his exciting campaign into the national spotlight. Beto's all-white stockyard town of El Paso, population some 200,000, is a unique place. Located just across the Rio Grande from Ciudad Juarez and a large source of illegal immigration, it's ground zero for the unfolding Mexican drug

war. It's one of the safest cities in the US, with a drop in violent crime between 2015 and 2016, but with a heavy presence of drug cartels and a seedy criminal underworld. Beto was an undeniably charismatic candidate for president. I met him in person during a tour of the border town, and talked to him on two separate occasions, once via satellite phone and once in person, when he came to El Paso. To me, the biggest question about Beto

was the question that would also define his campaign: Why, from the moment he was first elected to Congress in 2012, has he stuck to such a hardline stance against illegal immigration, to the point that even his most ardent supporters call it divisive? The answer is twofold, and it relates to where Beto stands on border security versus immigration, and how the four countries of origin – Mexico, Central America, the Caribbean, and South America – are represented in the United States. Both are important: if you think about the US, d0c515b9f4
