What is Sustainability? Although the word "sustainability" has become commonplace in business, many people do not fully understand what it means. In the same way that there are many different definitions of "love," it is difficult to define sustainability. However, there is a widely accepted definition that is taken from the United Nations. They define sustainability as meeting the needs of the present without compromising the ability of future generations to meet their own needs. In other words, it means meeting the needs of today and preserving the ability of future generations to meet their needs. It is a win-win situation for everyone involved. THE IMPORTANCE OF SUSTAINABILITY in the past we have seen examples of entire cities being built that were not sustainable, such as the extensive concrete "urban jungles" of Miami. Now it seems that cities around the world are recognizing their responsibility to help preserve their own future in light of the
