. A: I've just found a link on RapidShare which is kind of the original of the mirrors you have found. I guess the address to download: There is no fix there yet. But I cannot say if the file you are downloading

is the clean and fixed version. Sonic Screwdriver as the smallest critical element in the assembly of covalent and non-covalent molecular electronic devices. Sonic resonant vibration, i.e., localized mechanical vibration caused by the sound wave propagation, has recently been used to manipulate molecular assemblies or nanostructures. Since the resonant frequency can be tailored according to the molecular structure through the introduction of surface functional groups, the localised vibration is a powerful tool for the assembly or disassembly of molecular components. A common approach to this is to use pre-designed surface functional groups or surfactants to control the local resonance frequency and consequently control the assembly or disassembly of molecular components, e.g., DNA and proteins. However, the introduction of artificial functional groups often leads to the loss of the natural function of the

targeted molecules. This mini-review addresses the use of another tool of sound energy, the ultrasound, to form molecular assemblies. The response of the molecular assemblies to ultrasound energy is similar to that observed using the mechanical vibration by adsorbing or emitting sound energy and activating the local mechanical resonance. This approach has attracted considerable attention as the ultrasound can be generated and controlled at low-power consumption. It is also an internal vibration that is less likely to affect the structure of the target molecule. This mini-review will outline the general principles, recent progress, and some potential applications of the sound-driven assembly and disassembly of molecular materials.

Triumphant, very dangerous Alan Cummings isn't just the right man for the job. He may turn out to be Britain's best-ever foot-soldier for the Conservatives – and that's saying something. Sitting in his

office in Cleethorpes, Lincolnshire, Cummings is soft-spoken and diffident, but he has convinced us of two things. First, that he's not the sort of man who ever goes to bed without his helmet on. And second, that he is the person to lead the fightback against the resurg 6d1f23a050
