And it presents the images with no difficulties. The OS X comes in various versions, and at present the latest version is available as OS X 10.9.3 Mavericks. For MAC users, this is the gold standard to run the sophisticated applications on the MAC. At the very beginning, OS X was only available for the iMac, Macbook Pro and Macbook Air. Later, the OS X Mavericks was released for the users who had purchased these devices. Macbook Air: In MAC, you will have a hard time in finding an OS X 10.9 Mavericks. Because this operating system is only available for the Macbook Pro and Macbook Air. You can have a software that is actually compatible with both, but if your Macbook air is broken, then you can update your OS X. You can also consider those Adobe programs which are compatible with the

latest OS X. And again this is not the best option, because again you have to install the software in your system. iMac: But if your Macbook Pro is broken you can also update the OS X. Similarly, you can have the latest version of the OS with the same features. But for the iMac, you should go through a professional computer service center to update the OS. Macbook Pro: This is the best option to upgrade the OS X without any hassle. To update the OS X, you need to have an internet connection. You can update the software and also make sure about the security level. What is the OS X Mavericks? The OS X Mavericks comes with many improvement. The new operating system has a simple and elegant interface. It is suitable for the casual users. The graphical interface and the icons are handy. The OS X Mavericks is compatible with the Macbook Pro. And it is not compatible with the Macbook Air. It is very easy to set the preference in the

Mavericks. You can update the OS with the help of a serial number. And if you are looking to make your operating system compatible with any other platform, then you should go through the professional computer service centre.
