Of Narnia The Silver Chair Full. This invention relates to the improvement of control of the movement of heavy vehicles in quarries, particularly in quarries where the vehicle is not a common loader, e.g. a motor grader, or shovel, but has to cross deep water, sometimes several yards of water. In quarries such as the one shown in FIG. 1, heavy vehicles, namely those of the type referred to as shovels, are employed for the primary purpose of scooping the raw material, known as raw material, into the buckets of the vehicle, then after suitable treatment to remove the broken material from the raw material, conveying it to the processing facility, where it is formed into building blocks. In the quarries shown in FIG. 1, the vehicle has a bucket, A, which is used to carry the
