Black Clover Quartet Knights Update 5 Incl DLC

this news post is actually an update about something that happened a few days ago. on the 24th of february, chizu appeared in the black clover quartet knights playtest. while it was mostly a video update with a few spoilers, one of those spoilers could be this reveal: the game will be coming to ps4. while this might not mean much, it could mean more than what meets the eye. especially when you consider the recent history of the game: the ps4 version of black clover: quartet knights will most likely have better graphics and possibly have more content. this is probably why the game will only be launching on the ps4. the playstation vita version of the game likely wont have any additional content.

nexus go! players will be able to play a campaign in 4vs4 team battles and cast an array of magic spells to defeat the opposing team. players can play as a fighter (ranged characters), healer, support, and ranged as well as control up to 4 characters in one battle. during battles and in the story mode, players will collect black tulip in addition to magic spells to use in the battle. in addition to the two new heroes, players will receive a blueprint of the mask, cores, talismans, weapon and supplement items.also, starting with update 5, players will be able to unlock costumes and images of the four other heroes. in the future, it will also be possible to trade these costumes for duplicate ones. from the 100+ costumes unlockable from the first 4 updates, a limited number of them will be available for trade with players from other regions.download availability will be announced at a later date. for the first time, an original story that is not part of the black clover series will be playable. 5ec8ef588b
