Effex Pro by Synkronize Pro is one of the best plug-ins for After Effects I have come across and if you're not familiar with the term plug-in it simply means a simple program that adds functionality to your application. Plug-ins like Effex Pro add texture and lighting control to your timeline to create stunning effects. And if you're in to post processing, you can change the look of your footage in a specific filter. You can easily integrate a plugin like this with the standard set of actions provided by the project, or you can add your own. It supports many popular plugins, so feel free to try different effects and plugins without a problem. After Effects and Motion are designed to work together. To make the best use of your talents, you should try and work with After Effects as much as possible. You'll find that when you use both applications together, you'll be able to do more, faster. And doing it this way is much easier than switching back and forth between programs. On that note, I think I am done with this post. Let me know if you know any more great AE expressions. Have fun working with After Effects and try not to spend too much money. Let me know how it goes. May I suggest that all of you try creating your own After Effects motion graphics. It is one of the best ways to learn motion graphic design, and a really cool way to show off your work. Don't worry about the word count. If something is worth doing, it is worth doing well. Try doing 5 takes and then pick the best one. Make sure to keep a backup for your work!
