
PC Game - SimCity 4 [Multi5 Patch ITA] TNT Village Game _VERIFIED_ Download

furthermore, the deserts package has two new regions, 'deserta' and 'deserta south', which can be accessed through the 'desert theme' which is added as a free dlc item that is automatically installed once you complete the game. these two regions are mostly devoid of green areas, which means that there are more ways to collect revenue. you can build rides, hotels, etc. in these regions, but since they are lacking in natural resources they are going to take longer to build up than their green counterparts. also, the increased maintenance costs can be a problem if you are not careful. the best bet is to build rides and hotels early to bank on the new income sources. if you are more of a traditional simcity fan, then the 'classic' package is also available. this one has the same content and features as the 'destinations' dlc, but it is available from the start of the game. there are a few changes, though, like the lack of a strategic mode and the main map. it also lacks the 'green theme' which allows you to build green areas, which can be handy if you want to maximize the fun factor. if the price is right, then this is worth checking out, as it'll give you everything that the 'destinations' and 'deserts' dlcs have to offer without having to pay a price premium. now, if you want the full package, then there is the full 'destinations' dlc that comes with the game. it includes the new strategic mode, desert theme, green theme, and all the new regions. it has a price tag of \$25, which is a bit steep but it is really worth it if you are looking for a full experience. it is obviously the best deal if you are just looking to play through the game, but if you also want to try out the new gameplay then the 'destinations' package is the way to go.
