Over the last decade, we have been setting the standard for professional audio editing technology with features and tools that are unique in the industry. Also, each band member can record vocals and instruments in sequence and save them individually as separate tracks, allowing complete control over when each vocal or instrument is played. For edited material, the editor offers the most modern and complete export framework available, with the ability to choose between Pro Tools, Logic, Nuendo and any other program capable of importing MusicalXML files as input. When working with the Global Performance, the editor is easy to control and manage, and the user can browse through his or her work according to the respective time. Every tool is available directly from the work surface as well as from any MIDI controller. The new Patches function opens up the ability to apply and remove multiple patches without having to edit the score and move it manually. TextLab Editor Pro 7 allows for the systematic cross-checking of texts. The Assignments tools allow the user to assign chords, chromatic notes or whole tones to notes in a musical score, thus allowing for a more efficient, comprehensive and easier-to-understand notation. The Automatic chord calculation function not only offers an automatic chord calculation but also chord naming.
