Believing themselves to be performing a societal good, the vocal condemnation campaigns undertaken by opponents have resulted in such outcomes as a Japanese mangaka being harassed, Patreon blanket-purging any art even slightly fitting the styles standard, and a player being banned from a fighting game tournament for liking the genres numerous loli characters.

We therefore strongly oppose all criminal activity, censorship, and the use of loli as a euphemism for girl cosplaying. In a time when 3d digital content is flourishing for the first time in internet history, and is opening a vast world for many people, it

is important for the lolicon community to celebrate its community spirit and to defend its right to life. We think that the developers should be required to modify the code to stop such characters from appearing in their games and we also think that the designers should not be punished for a

decision that they made without the support of the vocal denizens of the 3D genocid community. It must be made clear that the developers of games of content that portrays loli, girls, and women only, are not committing a crime. Nor are the lolicon supporters committing the crime of censorship.

Loli supporters, like the creator of the banned Rockman-O, are defending their right to exist, to enjoy the fruits of their artistic labour, and to be able to draw their waifu without being harassed. What is the point of a law if the law cannot be enforced in a reasonable manner? The true problem with loli-

stigma is the lack of a concrete and enforceable system. The reason loli is a taboo is because it is virtual. A virtual citizen of the cyberspace that is unlike any other form of virtuality because of the easy defense provided by the same-sex partner. We have a cohabitation free of harassment and

parental interference
and a virtual story-world
where the protagonists
are free to be as they
choose. We should not
allow companies,
companies to enjoy the
fruits of our labor, that is
to say which is loli, that
they should not be able
to view and profit from a
generation of anime girls
that are paying workers

to satisfy their
debauched sexual urges.
