Amibcp 3.37 66

[Download](#)

---

ok, i found it. it was a bit hidden in the zip archive, it was file "v6\_7.zip", and inside were the files "v6\_7" and "v6\_7\_amibcp3\_3.0.1.zip", the latter was the one with the real.zip archive. the files inside "v6\_7" are all in hex format, among which there are the v2\_21, v3.13 and v3.13\_amibcp.hex i dont know how i used the v3.hex file to check for the existence of the "v6\_7\_amibcp3\_3.zip" file, but i just did, and it worked, my name is all bolded in the post above. i tried to open the v3.hex with the included amibcp 2.42, and it works, both the amibcp 3.13 and the v3.hex files load, but i only got the multilanguage module not found error message. but the v3.hex file with the amibcp 3.13, works properly when you use the amibcp 2.42.i have installed the amibcp 3.13, but i cant find the

---

module.. i guess i should have guessed. ok after a few more hours trying to figure out how to remove the multilanguage module not found error, i decided to add a single word to one of the files. it was the "ami" module. i searched for the word "ami" in the v3.13\_amibcp.hex file and found it, changed the first byte of the word "ami" from "86" to "87" in hex, saved, and it worked. i can now open the amibcp 3.13 with amibcp 3.37.i will try to remove the word "ami" from all the files to make it work with amibcp 3.13 and amibcp 3.37 (i think that is the command i should use), and will inform you of it.i am now loading the amibcp 3.13 and the v3.hex file with the amibcp 3.37, and i think it will work, will report back when it does..thanks for the help.

## Amibcp 3.37 66

in amibcp v7.60 you can indeed only flash in a single file. the difference between v7.60 and v7.61 is the layout, not the file size or original byte layout, so you can just use the v7.61 settings file and be done with it. hi stu, i'm trying to make the flashrom.bin file to be compatible with amibcp 5.02, but i have a problem that the flashrom.bin file doesn't work in amibcp 5.02. i'm using the tool of flashrom v0.7.2 i think is the latest version. so could you please help me? thanks a lot, mauricio

supported platforms: windows xp, windows 2000, windows nt, windows 98, windows me, windows vista, windows 2003, windows xp x64  
Inix, cnix, Inix  
amibicp v451 Inix amibcp v5.02  
linux amibcp v453 wii amibcp

---

v5.03 version 5.06 of amibcp has problems. i had issues with flashing back to amibcp v5.03, i cant even see the setup tap. i just loaded it as an option in ios but still have issues with flashing back to the amibcp 5.03: ok, finally found the issue. i was using the 3.37 for dos amibcp version, but the file was produced by the 3.36 version. i just used the 3.36 amibcp for dos and edited the bios of the km266 board and it was like magic. it actually did show the entire column, i can make changes, save them and the screen refreshes. i changed the language to english and the popup shows the selected language in the bottom right corner. makes me happy. i'll be testing the newer version for a few days and see if i can get it working with my old board. just a little bit of a workaround. thanks
