

# Wintv 7 Product Code Or Serial 289 ((HOT))

[Download](#)

for the wintv v8 app, to use the sdtv channel guide and to display the program guide on the television screen, go to settings and select output. under output settings on the left side, select custom and scroll down to the output settings section. in the output settings window, under selects output device, select tv for tuner1. wintv-dualhd is compatible with microsoft windows 10, 8, 7, vista, xp or windows 98se/me. this driver also supports windows 95, windows nt4, windows 2000 and windows xp with service pack 3 or later, and windows 98 with service pack 2 or later. it is important that you set the aspect ratio to 4:3. most videos are being delivered with an aspect ratio of 4:3. in order to get the best results, your display should have a 4:3 aspect ratio. the wintv application should detect this correctly. if your aspect ratio is 16:9, then it may be resized when the video is sent. we are not responsible for any resizing of the video. we suggest that you set the video resolution to 1080i for a tv broadcast quality video and recording a tv program. to be recognized by the tvtuner setup utility you must select an option from the list. the tv tuner setup utility defaults to allowing the first tv tuner found. you will be prompted for a serial number, then you will be asked to select a format (dtv, qam or atsc). the wintv application can be installed on as many computers as needed as long as you use the same hauppauge device. we link the serial number of your tv tuner (sometimes it's the mac address) with the activation code. so as long as you use the same hauppauge device, you can install on more than one computer.

## Wintv 7 Product Code Or Serial 289

now go back to the channel setup screen. to add a second channel, you can either repeat the process for the first channel, or select the second channel from the list and click add. if you don't see the second channel listed, you may need to scan for that channel as well. you can change the starting and ending channel numbers at any time by clicking the gear icon at the top of the channel list and select channel setup. also, you can tell the wintv application not to start when the system is turned on by unchecking the start on start up check box. if you are connecting your hauppauge tuner to the tv by using a cable box, there are two types of tv signal and how you connect them to the wintv. if you are using a network setup, then you will need to choose either the network or ntsc signal. home networking related: with wintv-dualhd, you can record two channels of free over-the-air hdtv and watch a third channel with the hauppauge wintv-dualhd application for windows. view live tv, pause and record two channels of free over-the-air hdtv, clear qam digital cable tv and watch two other channels live with the wintv-dualhd application for windows. wintv-dualhd will work with any tv tuner, tv (not cordless) antenna and home network of your choice. use with microsoft windows 7 (32/64-bit), 8, vista, xp (32/64-bit), mac os 10.5 (32/64-bit) and linux (32/64-bit). please refer to the wintv-dualhd web page for details of compatible devices and instructions on installing the wintv-dualhd application. if you try to add channels that are not in the scan list, then you should see a message in the lower right hand corner of the wintv application. select "no channels found". if you continue to try to add channels, then the application will eventually stop responding. to try to fix this, try uninstalling and reinstalling the softpvr application. you may also want to try an older version of the softpvr application. version 0.6.0 was probably the last version tested. if you have a previous version installed, go to the software downloads page and download the latest version. 5ec8ef588b
